

FACILITIES and CUSTODIAL STAFF:

You can make an enormous impact on the health and well-being of students with asthma.

Did you know?

- Asthma is often a cause of student absenteeism
- Many things in the school building can cause a child to have an asthma attack:
 - Pests, like mice and roaches
 - Pesticides
 - Dust, often from clutter
 - Bleach and disinfecting products
 - Other scented cleaning products

We know that you know the school building inside and out.

Create a healthier learning environment by:

- Participating in the school wellness committees
- Educate teachers, administrators and other staff about safe pest management and the IPM log
- Advocate for increased funding so you can make needed repairs
